

Community media field notes

A working notes PDF for producers, ambassadors, and county desks. Sample content. Not a research study.

1. Name the place

Open with the county, the street, and the people in the room. Distant feeds skip this. We do not.

2. Gain staging

Use the Audio Analyzer tool before you go live. If peak is hot, ease the gain. If RMS is quiet, move closer.

3. Credits

Always credit the county, the shop, and the neighbor who opened the door. Community credits are a KnowledgeHUB lesson for a reason.

4. Records

Publish SelfCare files as personal records. Upgrade to simulated Stellar or IPFS only when

you want the badge UI. Nothing here spends on chain.

5. Two requirements

Excel in your field. Promote the rest of the network. That is the whole operating system.

6. Empty states are honest

If a county has no episode yet, say so. Do not invent a Launch button that goes nowhere. This app ships real files and real tools.

Checklist

Room quiet. Levels checked. Guest named. Shop thanked. Record filed. Ambassador invited. Hub promoted.

Keep notes in Studio. Save tool snapshots. Track course progress on KnowledgeHUB.

Interview frame

WHO is in the chair. WHAT happened this week. WHERE on the map. WHY it matters to a family or a shop. VOICE is a quote you can read back to the guest.

After the show

File the record. Share the KnowledgeHUB link. Thank the shop on InPoint Social copy, not on a corporate feed. Preview a neighbor gift if someone asks how to help. Never promise a live charge from this app.

Gear bag

Quiet corner. One decent mic. The pin on the table. A printed ambassador kit. A charged laptop running this local studio.
