

DAO charter excerpt | sample

Excerpt for rehearsal. This is not a filed legal instrument. InPoint DAO in this app uses a local poll engine. Stellar governance language is company copy.

Purpose

A community-powered tech and broadcast company built for the people, by the people. We The People remain the source of all power. Information lands in The National Records.

Membership

Members publish, learn, and promote the rest of the network. Admin stewards edit site copy, products, theme tokens, and the preview payment catalog.

Treasury note

This local app has no live treasury. Checkout is preview only. No card is charged. Stripe is never called. Simulated Stellar hashes are not payments.

Voting

Community Poll Engine stores tallies locally until you save them to your studio. No on-chain

ballot is submitted.

Records

The National Records remain the public library of SelfCare files, published work, and public records. Verification is personal or simulated.

Close

Replace this excerpt when counsel and the founder publish a real charter. Until then, treat every page as a placeholder with honest labeling.

Operating orgs

PreFormance ME. Think Local. Think National. Self Govern Academy. The National Records. Five-tier cohesion still starts with We The People.

Amendments

Studio admins may edit site copy and elements. They may not turn preview checkout into a live charge from this codebase. They may not spend chain assets from this codebase.

Signature block

Page 2 of 3 | Local demo file. No live payments.

Sample only. No wet signature. No token. No legal effect. Dated for the local demo year.

Page 3 of 3 | Local demo file. No live payments.
