

InPoint Quarterly | Sample issue

Company copy sample. This file is a local demo PDF, not an audited magazine. Founders can replace it from Studio.

Powered by We The People

InPoint Network is a community-powered tech and broadcast company. We amplify authentic voices, bold ideas, and collective intelligence across TV, print, podcasts, digital, and people on the street.

The two requirements stay simple. Excel in your field. Promote the rest of the network.

From the editor

This sample issue exists so the Resource Library has a real PDF to download. It is not a news fact sheet. Membership figures used in marketing (250K+, 180+, 42 markets, \$0 paywalls) are labeled company copy and are not independently verified in this app.

County table

A Local Action Ambassador is the heartbeat between Think Local and Think National. They host a table, invite a shop owner, and keep the records honest. PreFormance ME trains the body. Self Govern Academy holds the six foundational elements as placeholders until the founder

names them.

Broadcast notes

InPoint Live is the town square. On-demand is the library. The People's Network remains the flagship podcast slot. Signal and Noise is the analysis series. Voices Unheard holds long-form audio journalism.

Stellar, simulated

Authenticity and decentralized ownership are modeled on Stellar and web3. This local app never spends XLM, never calls Horizon, and never pins to IPFS. Verification badges are Personal, simulated Stellar, or simulated IPFS hashes stored in JSON.

Print still matters

Independent print belongs to families and locally owned businesses when the hub stays honest. InPoint Press and InPoint Daily are listed as formats, not as hosted newsrooms in this development build.

How to use this sample

Share it with a county partner as a layout stand-in. Replace pages in Studio when the real quarterly is ready. Keep the voice optimistic, transparent, and community-centric.

Excel in your field. Promote the rest of the network.

Field postcard

A shop owner on Main Street asked what the pin means. It means we show up. It means records are public. It means the broadcast is not owned by a distant feed.

Credits

Sample produced for the InPoint Network local SaaS. No Hostinger deploy. No live Stripe. No chain spend.

Pathway snapshot

Grassroots beginning. State coordinators. Brand ambassadors. Independent journalists. Revenue through subscriptions, streaming, ambassadors, local co-ops, and ads. All of that is the founder brief. This PDF only rehearses the layout.

KnowledgeHUB classroom

Broadcast Fundamentals, Podcast Mastery, Community Journalism, Decentralized Systems, Policy Advocacy, and Local Action Ambassador Training sit in the living library. Progress saves to your member account as a percentage, not a certificate mill.

Page 3 of 4 | Local demo file. No live payments.

Tools on the desk

Audio Analyzer, Broadcast Scheduler, Community Dashboard, Story Builder, Poll Engine, Network Mapper, Resource Library, AI Assistant (local stub), Stream Health Monitor. Each one saves to studio JSON when you are signed in.

Closing spread

When people are informed, connected, and heard, communities transform. That is InPoint Network. Keep this issue on the table until the real quarterly lands.
